- Axios
- Express JS
- MongoDB
- Mongoose
- .NET
- Scrum
- Agile

DEVELOPMENT PROJECTS

HappiNest

A mobile app intended for roommates to divvy out chores, keeping track of who has the most points based on the task. Each person has a personal profile and can be in any number of houses.

Plan-It

Plan-It is a type of Kanban, which is a visual system for managing work as it moves through a process. It visualizes both the process (the workflow) and the actual work passing through that process. The goal is to identify potential bottlenecks in your process and fix them so work can flow through it cost-effectively at an optimal speed or throughput.
